Subject: Release notes for MES taxonomy Data, Information & Technology Data Services

DNB MES Release notes 2.1.0

Date 09 December 2021

Reference T011-233838012-79

Introduction

These are the release notes of the MES xBRL taxonomy that captures the reporting requirements for the compilation of various macroeconomic statistics, such as sector accounts, balance of payments, international investment positions and various sector statistics. The reporting itself is named Macroeconomic Statistics Reporting (MESREP), in Dutch: Macro-Economische Statistiek Rapportage (MESRAP).

Reporting obligations based on this MES taxonomy will be introduced for data for the first quarter of 2022. The xBRL reporting guidelines will be communicated separately.

It contains entrypoints for all the different reporting institutions depending on the financial sector to which the institution belongs, the size and the nature of the activities that are carried out.

DNB customarily publishes its xBRL taxonomies as follows. Two packages for each Reporting Framework:

- 1a A package with the Reporting Framework;
- 1b A package with the Data Dictionary, explicitly for the Reporting Framework listed in 1a; elements that are only used in other frameworks are not included here.

Three common packages that are required for the implementation of DNB taxonomies are (these are available for download from the DNB website):

- 2a A package with the full DNB Data Dictionary;
- 2b A package with the Supplementary Taxonomies (these are taxonomies that are not managed by DNB but are necessary for the proper functioning of the DNB taxonomies - these are www.xbrl.org and www.eurofiling.info);
- 2c A package containing custom functions for the <u>www.dnb.nl</u> reporting frameworks (only required to those frameworks making use of these custom functions).

1. Content of the release

This publication set contains:

1. DNB MES Release notes 2.1.0.pdf

The release notes for version 2.1.0 of the taxonomy (this document).

- DNB MES DPM dictionary and annotated templates 2.1.0.xlsx
 An Excel workbook with the datapoints, partial data dictionary, hierarchies used in the taxonomy, annotated templates, assertions and entrypoints.
- DNB MES Reporting framework 2.1.0.zip
 A taxonomy package zip file containing the DNB xBRL taxonomy with the MES framework version 2.1.0.
- 4. DNB MES Reporting data dictionary 2.1.0.zip

A zip file containing the partial Data Dictionary with elements present in this taxonomy.

5. **DNB MES Sample instances 2.1.0.zip**

A zip file containing sample xBRL instances, one for each entrypoint.

6. DNB MES Excel templates 2.1.0.zip

A zip file with the Excel templates per entrypoint that will be used in Digitaal Loket Rapportages (DLR) as soon as reporting with xBRL starts.

2. Changelog

2.1 Version 2.1.0

Changes made to this version of the taxonomy are:

- The financial derivatives instrument 'credit default swaps' is shifted from T10.01, T10.02, T10.03, T10.04, T10.09 and T10.10 to forms T10.07, T10.08 and T10.12 for Forwards.
- The allocation of the instruments on forms T03.06, T03.07, T06.04 and T08.03 to instruments on overview-form T11.01 has changed (expressed in validation rules).
- On forms in the T12 series the name of the column 'Debit amount' is replaced by 'Revenues' and that of the column 'Credit amount' by 'Costs'. The entry fields for the items 'Result from pre-tax operational management' and 'Result from operational management (net)' are shifted from column c010 to c020.

At Accounting entry the following entries swap columns: 'Debit (Uses)' goes to c020 and 'Credit (Resources)' goes to c010. The corresponding short labels are also changed.

- A new entrypoint has been added: Financial Vehicle Corporations engaged in securitisation transactions (FVC).
- On the T10.05, T10.06 and T10.11 forms for futures the c030 Revaluations column is eliminated.
- For entrypoint IC the forms T05.01 and T09.02 are replaced by new forms and a new form T09.07 has been added.
- Assertions have been added and inadequacies fixed. For the full overview of the changes in the set of assertions, please consult the 'Assertions' tab in the *MES DPM dictionary and annotated templates 2.1.0.xlsx* file.

A document with an overview of all amendments and further details is available on the designated section on the <u>DNB website</u>. Specific changes to the DNB Data Dictionary as a consequence of this taxonomy update can be seen in the changelog registry published on the <u>DNB website</u>: "*DNB Data Dictionary – Changelog.xlsx*".

EUROSYSTEEM

2.2 Version 2.0.0

This is the first version of the taxonomy to be published and to be made available to reporting institutions for implementation, also for receiving feedback from them. This version has not been used for mandatory data deliveries for the compilation of statistics.

2.3 Version 1.0.0.

This version is created for internal use only.

3.**Scope**

The taxonomy is comprised of the following 13 modules:

Module	Module Label	Technical entrypoint (Note: these are
		URIs, not URLs!)
ALL*	All	http://www.dnb.nl/nl/fr/xbrl/fws/dnb-nr/mes-2021- 01/2021-12-31/mod/mes-all.xsd
DNB	De Nederlandsche Bank	http://www.dnb.nl/nl/fr/xbrl/fws/dnb-nr/mes-2021- 01/2021-12-31/mod/dnb.xsd
DTC	Deposit Taking Corporations	http://www.dnb.nl/nl/fr/xbrl/fws/dnb-nr/mes-2021- 01/2021-12-31/mod/dtc.xsd
MMF	Money Market Funds	http://www.dnb.nl/nl/fr/xbrl/fws/dnb-nr/mes-2021- 01/2021-12-31/mod/mmf.xsd
IF	Investment Funds	http://www.dnb.nl/nl/fr/xbrl/fws/dnb-nr/mes-2021- 01/2021-12-31/mod/if.xsd
IC	Insurance Corporations	http://www.dnb.nl/nl/fr/xbrl/fws/dnb-nr/mes-2021- 01/2021-12-31/mod/ic.xsd
PF	Pension Funds	http://www.dnb.nl/nl/fr/xbrl/fws/dnb-nr/mes-2021- 01/2021-12-31/mod/pf.xsd
FVC	Financial Vehicle Corporations engaged in securitisation transactions	http://www.dnb.nl/nl/fr/xbrl/fws/dnb-nr/mes-2021- 01/2021-12-31/mod/fvc.xsd
OFI	Other Financial Institutions	http://www.dnb.nl/nl/fr/xbrl/fws/dnb-nr/mes-2021- 01/2021-12-31/mod/ofi.xsd
TURN	Turnover goods, services and licenses	http://www.dnb.nl/nl/fr/xbrl/fws/dnb-nr/mes-2021- 01/2021-12-31/mod/turn.xsd
BAL	Balance sheet total	http://www.dnb.nl/nl/fr/xbrl/fws/dnb-nr/mes-2021- 01/2021-12-31/mod/bal.xsd
KEY	Key-items	http://www.dnb.nl/nl/fr/xbrl/fws/dnb-nr/mes-2021- 01/2021-12-31/mod/key.xsd
IFSB	Investment Funds Shares and Balance sheet total	http://www.dnb.nl/nl/fr/xbrl/fws/dnb-nr/mes-2021- 01/2021-12-31/mod/ifsb.xsd

(*) The ALL entrypoint contains all forms. This entrypoint shall not be used for reporting and could be used for local testing purposes.

4. Excel workbook with specifications

The Excel workbook (*MES DPM dictionary and annotated templates 2.1.0.xlsx*) contains the following sheets:

1. **Taxonomy** [*red*]: an overview of the tables incorporated in the taxonomy and to which modules these tables apply;

- 2. *Hierarchies* [*red*]: an overview of all the hierarchies (selection lists) defined for this taxonomy.
- 3. **Assertions** [*red*]: an overview of all the assertions and their characteristics defined for this taxonomy. Assertions are specified according to the following characteristics:
 - *ID*, the unique identification of assertion;
 - Changed per, date of the last change;
 - Last change, changed aspect;
 - *Module(s)*, the module(s) that are adressed by the assertion;
 - *Tablegroup(s),* the tablegroup(s) that are addressed by the assertion;
 - *Table(s)*, the table(s) that are addressed by the assertion;
 - Severity, either ERROR (blocking) or WARNING (non-blocking);
 - Precondiction; The condition(s) that needs to be met for the assertion to be evaluated. This condition always consists of a table for which its corresponding filing indicator has to been put to positive. If no precondition is given, the respective assertion is always evaluated.
 - *Threshold*, the margin that applies to the assertion;
 - Fallback, indicates whether non-reported facts involved in the assertion are replaced by a 0 or {} (empty string). If fallback is set to false, a missing fact will result in the assertion not being evaluated.
 - Formula, the OK situation the validation rule verifies;
 - Message, The message that is returned when the assertion is triggered.
- 4. **Partial data dictionary** [purple]: containing all domains, dimensions, members and metrics that are relevant for this taxonomy. This overview consists of the following sheets:
 - a. *Data Points*: a complete list of all the data points and their data definition;
 - b. Dict Metrics: sheet containing all the metrics used in the taxonomy;
 - Dict Dimensions: sheet containing all dimensions used in the taxonomy;
 - d. *Dict Explicit Domains*: sheet listing all domains used in the taxonomy;
 - e. *Dict Domain Member*: sheet listing all the members per domain used in the taxonomy;
 - f. *Dict Typed Domains*: sheet listing all the typed domains used for the taxonomy;
 - g. *Dict Hierarchies*: sheet listing all the hierarchies used in the taxonomy.

5. **Annotated templates** [blue]: for each form for data reporting the specifications of the affiliated data points can be viewed in the sheet with the corresponding label.

5. Sample instances

For testing purposes, for each module an xBRL instance document with fixed interval data is provided in DNB MES Sample instances 2.1.0 zip.

6. Excel templates

In the DNB MES Excel templates 2.1.0 zip, the Excel templates are available for each of the entrypoints, which may be used for data input. Validation results are communicated in the format of these excel templates as well.

Please note that it is not allowed to change the structure of the Excel template files, this will give problems during processing of the filings if the Excel templates are used for reporting. Furthermore, in case of submission in Excel format, you are always advised to use the download link in DLR (Digitaal Loket Rapportages) instead of the ones contained in DNB MES Excel templates 2.1.0 zip, to make sure you always use the most recent version of the templates for submission.

7. DNB filing rules

The eXtensible Business Reporting Language (XBRL) specification provides a high degree of flexibility in the creation of XBRL instance documents. Part of this flexibility stems from the nature of the syntax: XML, and part stems from the XBRL specification itself.

The DNB filing rules represent a collection of additional rules and guidance specifically applicable to remittance of XBRL instances for regulatory filings of national taxonomies of DNB. These rules constrain the full flexibility of XBRL, to enable effective interaction between transmitter and recipient/consumer of regulatory reports.

The 2.1.0 version of the MES taxonomy will be checked against the most recent version of the DNB filing rules. These rules (available for download) can be found <u>here</u>.
